Nature Of Opinion

Docket Number: L-00000YY-15-0318-00171 **Docket Position:** Against

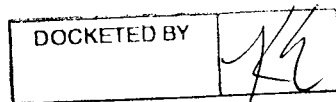

The construction of the sons of transmission line through the San Pedro Valley should not be allowed to go forward for several reasons. First, it is unnecessary because it is already possible to add additional lines to transport power through existing roots or on existing structures. This would waste money by constructing an entirely new line. Second, it would destroy important habitat for native Arizona animals and hundreds of species of bird that use the San Pedro River as a migration corridor. It is one of the most significant migration corridors in all of North America. It would also spoil the natural beauty of the valley that is the least developed in all of southeast Arizona.
